# Signing orders in Online Banking using Smart key in Online mode

You need to meet 2 conditions in order to use online signing via Smart Key:

- Allow push notifications in settings of your phone and in Smart Key app as well,
- Your phone needs to be connected to the internet while signing.

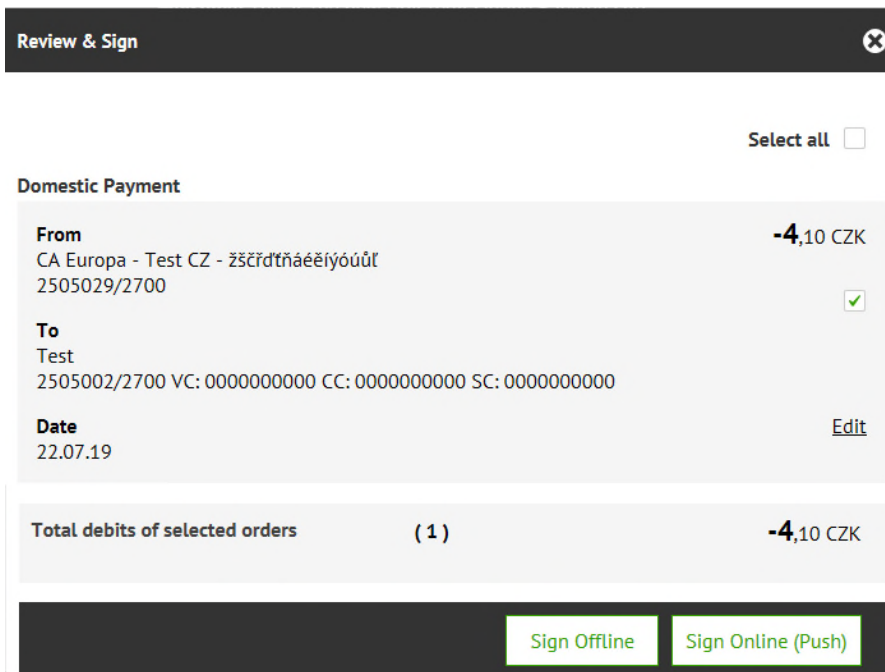

If push notifications are not allowed in Smart Key app there will be no “Sign Online (Push)” button as a signing method.

Log in to Smart Key app to allow notifications. Go to Settings using the cogwheel icon on Smart Key main screen. Enable the third option “Order summary notifications”.

## STEP 1

Select order(s) for signature and press the „Sign Online (Push)“ button.

„A notification has been sent to your mobile phone for the authorization of the selected transaction(s). Press OK button if you authorized them, otherwise press Cancel.“ message is displayed.

The notification for the authorization of transaction(s) will be delivered to your mobile phone. Don't tap the button "OK" now.
