- Production date of the KID: 13/10/2025

You are about to purchase a product that is not simple and may be difficult to understand.

## 1. WHAT IS THIS PRODUCT?

### TYPE

A Deposit Bill with an embedded FX derivative element - Premium Deposit Bill

### TERM

The product has a fixed contractually agreed term and will terminate after 1 month.

### OBJECTIVES

Premium Deposit Bill products are used to enhance interest rate returns.

A Premium Deposit Bill is an agreement between two contracting parties (client/UniCredit Bank Czech Republic and Slovakia, a.s.) where the client invests an agreed investment amount of one currency (e.g. EUR investment amount) at an agreed fixed rate and for an agreed maturity date. The fixed rate is higher than the current market rate because it is directly related to the currency risk, arising from the potential repayment of the investment amount in another currency (e.g. USD switch amount) depending on the FX rate at the determining date (usually 2 working days before the maturity of Premium Deposit Bill) and the determining time.

At maturity, you will receive a fixed rate payment in the investment currency (e.g. fixed rate payment).

The possibilities for the repayment of the investment amount are as follows:

- if at determining date the spot rate (i.e. the price of the currency pair on the spot market) is below the agreed FX rate, you will receive the agreed investment amount (e.g. EUR investment amount) on the maturity date.
- if at determining date the spot rate (i.e. the price of the currency pair on the spot market) is at or above the agreed FX rate, you will receive the FX switch amount (e.g. USD switch amount) on the maturity date. The switch amount will be determined by multiplying the EUR investment amount by the agreed FX rate

In addition, you might agree to pay a premium to the bank; in any case, you will not get back the premium you paid.

Sample product terms are set out below and are based on legally predefined or realistic assumptions and may not match your specific contract details, e.g. your specific notional amount, whether or not you will pay a premium, etc.

Currency pair	EUR/USD
EUR investment amount	EUR 10,000.00
USD switch amount	USD 11,699.00
Agreed FX rate	1.1699
Determining date	13/11/2025
Settlement date	17/11/2025
Premium	EUR 150
Premium settlement date	15/10/2025
Determining time	10:00 a.m. New York Time

## INTENDED RETAIL INVESTOR

This product is designed for retail investors who

- hold this product for the contractually agreed term,
- are in position to bear losses up to the total loss of the investment amount and
- have comprehensive knowledge of and/or past experience with OTC derivatives and the financial markets.

## 2. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

**Be aware of currency risk.** You may pay and/or receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

### PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		1 Month
Example notional amount:		EUR 10,000
Scenarios		If you end after 1 month
<b>Minimum scenario</b>	There is no minimum guaranteed return. You may have to make further payments to cover losses.	
<b>Stress scenario</b>	What you might get back or pay after costs Average return/loss over notional amount	EUR 9,185 -8.2%
<b>Unfavourable scenario</b>	What you might get back or pay after costs Average return/loss over notional amount	EUR 9,757 -2.4%
<b>Moderate scenario</b>	What you might get back or pay after costs Average return/loss over notional amount	EUR 9,911 -0.9%
<b>Favourable scenario</b>	What you might get back or pay after costs Average return/loss over notional amount	EUR 9,911 -0.9%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back or pay.

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes, which have been calculated based on simulations using the past performance of the currency pair over the past 5 years. The stress scenario shows what you might get back or pay in extreme market circumstances.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will make a large loss if you do so.

### 3. WHAT HAPPENS IF UNICREDIT BANK CZECH REPUBLIC AND SLOVAKIA, A.S. IS UNABLE TO PAY OUT?

Counterparties of derivative transactions are exposed to the risk that UniCredit Bank Czech Republic and Slovakia, a.s. becomes unable to discharge its obligations under the transaction, for example in the case of an insolvency (inability to pay or overindebtedness) or in the case resolution measures are taken by an authority against the credit institution. Such a decision to take resolution measures can, for example, be taken if the assets of the institution are less than its liabilities, where it is unable or will, in the near future, be unable to pay its debts or other liabilities as they fall due, or where it requires extraordinary public financial support. Where resolution measures are taken, the competent resolution authority can decide on an early termination of the derivative transaction. In the case such early termination results in a claim of the counterparty against the credit institution, the decision of the resolution authority can lead to a partial or complete reduction of the principal amount of this claim or in a conversion of this claim in to equity (shares or other types of equity).

If UniCredit Bank Czech Republic and Slovakia, a.s. does not fulfil its obligations connected with the product or is unable to pay, you can lose part of or the full payout or can suffer an unlimited loss.

### 4. WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs

and how they affect your investment.

## COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- The product does not change in value (0% annual return).
- A notional amount of EUR 10,000

If you end after 1 month (Recommended holding period)	
<b>Total costs</b>	EUR 150
<b>Cost impact (*)</b>	1.5%

(\*) This illustrates the effect of costs over a holding period of less than one year. This percentage is calculated considering the aggregated cost in the period divided by the notional amount and cannot be directly compared to the cost impact figures provided for other products.

## COMPOSITION OF COSTS

One-off costs upon entry or exit	If you end after 1 month
<b>Entry costs</b>	These costs are already included in the price you pay. Up to EUR 150
<b>Exit costs</b>	Not applicable

## 5. HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

### Recommended holding period: 1 Month

The recommended holding period corresponds to the contractually agreed term. You are not entitled to unilaterally terminate the product prematurely. However, the right of early termination may be agreed for one or both contracting parties. In the event of an agreed early termination, you will either receive or pay a compensation payment, which is made up of the market value of the product and the termination costs, including a margin earned by the bank. Significant additional costs may be incurred.

## 6. HOW CAN I COMPLAIN?

You can make complaints about the product, or about the behaviour of the issuer of the product or of the persons that provide advice regarding or who sell the product, on the following website [www.unicreditbank.cz/PRIIPS](http://www.unicreditbank.cz/PRIIPS), in writing to UniCredit Bank Czech Republic and Slovakia, a.s., Service Quality Management, Želetavská 1525/1, 140 92 Prague 4, Czech Republic or via e-mail to [info@unicreditgroup.cz](mailto:info@unicreditgroup.cz).
